

Lab 2: Agile Backlog Creation & Sprint Simulation in Jira

Name: Gaurav Girish

SRN: PES1UG24AM103

Project: Campus Placement & Internship Pipeline

Use Case(s): View Application Status

Epic and User Stories

Epic 7: Application Status

Description: Let students view the status of their applications and offers.

User Story	As a	I want to	So that	Priority	Story Points
7.1 View Application Status	student	see the current status of my applications	I know where I stand in each drive	Medium	2
7.2 View Offer Status	student	see my offer status on my dashboard	I do not have to ask the placement cell	Low	1

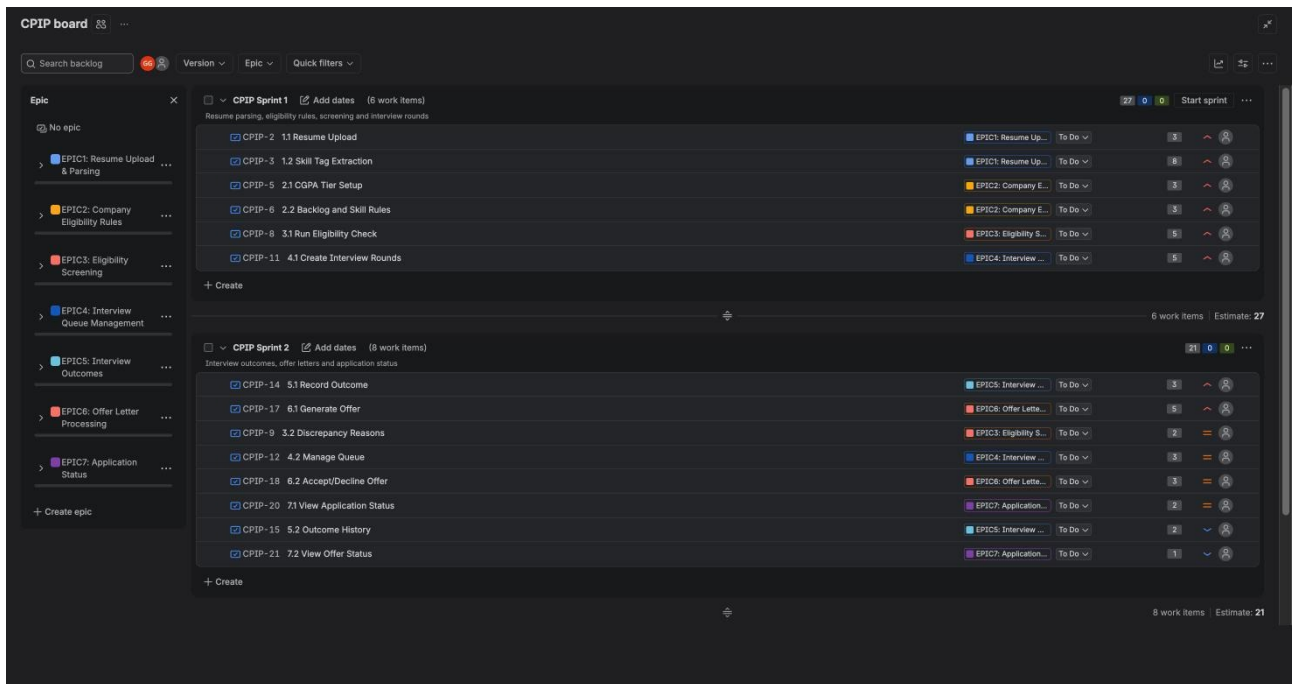

Sprint Allocation (1 week each)

Sprint 2: 7.1, 7.2 (3 points)

Total: 3 points

Screenshots

Jira Backlog with Epics and User Stories:

Story Point Assignments:

The screenshot shows a Jira interface for an Epic titled "EPIC7: Application Status". The left sidebar contains sections for Description, Child work items, Linked work items, Confluence content, and Activity. The main content area displays a table of child work items with columns for Work, Priority, Story P..., Assign..., and Status. The right sidebar shows details for the Epic, including Assignee, Reporter, Labels, Due date, Start date, and Priority. The bottom of the right sidebar shows the creation and update history of the Epic.

Sprint Board (Active Sprint) - Sprint 2:

The screenshot shows a Jira Sprint Board for "Sprint 2". The board is divided into three columns: TO DO, IN PROGRESS, and DONE. Each column contains a list of tasks with their respective status, priority, and assignee. The board also includes a search bar, filters, and a "Complete sprint" button.

CPIP board

Summary **Timeline** **Backlog** **Active sprints** **Calendar** **Reports** **List** **Forms** **Goals** **Components** **Development** **Releases** **More**

Search board **Version** **Epic** **Quick filters** **Complete sprint** **Group**

TO DO 4

- 6.2 Accept/Decline Offer
EPIC6: Offer Letter Processing
GP1P-18
- 7.1 View Application Status
EPIC7: Application Status
GP1P-20
- 5.2 Outcome History
EPIC5: Interview Outcomes
GP1P-15
- 7.2 View Offer Status
EPIC7: Application Status
GP1P-21

IN PROGRESS 2

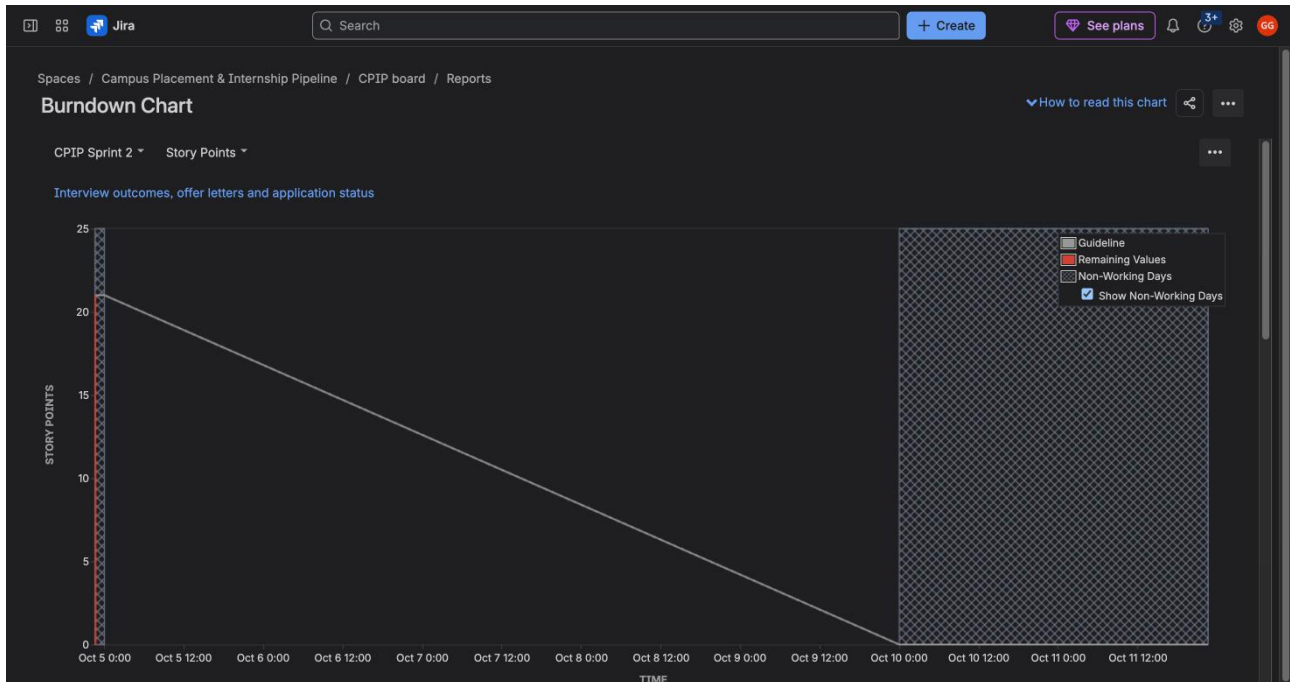

- 3.2 Discrepancy Reasons
EPIC3: Eligibility Screening
GP1P-9
- 4.2 Manage Queue
EPIC4: Interview Queue Management
GP1P-12

DONE 2

- 5.1 Record Outcome
EPIC5: Interview Outcomes
GP1P-14
- 6.1 Generate Offer
EPIC6: Offer Letter Processing
GP1P-17

Burndown Chart - Sprint 2:

Reflection Questions

1. Did your estimations reflect the actual effort?

Yes. My epic (Application Status) had two small stories, 7.1 with 2 points and 7.2 with 1 point, since they only display data that the other modules already store. 7.2 was the smallest item in the backlog and the low estimates matched the effort needed.

2. Was your backlog well-prioritized?

Yes. Application Status depends on the eligibility, interview outcome and offer data, so it made sense to keep it at Medium and Low priority near the bottom of the backlog.

3. How did your simulated sprint align with your plan?

Both my stories were planned for Sprint 2 and both were completed. Since they were ranked low, they were among the last stories moved to Done, which matched the plan. Sprint 2 had 21 points in total and all of it was completed.

4. What insights did the burndown chart give about your team's capacity?

The Sprint 2 burndown dropped from 21 to 0 almost immediately instead of following the guideline, because the sprint was simulated in a short time. It shows the team can complete around 21 points in a one week sprint, but it does not show a real day by day pace.
